Weekly News Bulletin.

The Department of Agriculture is continuing its investigation of the hay situation in the northern districts, but no hay buyers have been sent out by the Government. When such hay buyers are sent out, they will be furnished with the proper credentials.

Various authorities in the Lethbridge district estimate that the production of all grains in Southern Alberta will total thirty-four million bushels this fall.

A considerable reduction in the number of foreclosures on Southern Alberta farms has resulted as a consequence of recent provincial legislation, it is stated.

That the Western Provinces will ship considerably more wheat to Japan the coming season than formerly, is the statement made by the director of a large Japanese grain firm at present visiting Alberta.

Owing to the shortage of feed in the northern districts and its effect on the livestock industry, a tendency has been shown in some quarters to rush stock to market. When the Legislature was in session the Minister of Agriculture deprecated this, and advised that the farmer should hold off till September at least. In the South, this year, there is much more feed than is required by the limited number of livestock there. Those here who have more cattle on their hands than they will be in a position to feed should find a ready sale for them in the South, if they would only be a little more patient.

That Water Tank.

A special meeting of the Town Council was held last Thursday evening, to consider tenders for constructing the concrete water tank, part of the proposed system for giving the Town some fire protection, as recommended by the Provincial Fire Commissioner.

Tenders had been received from Mr. Valk, the local contractor; the other from Mr. Swanson, the Edmontonian who laid the concrete pavement in Stony last year. Mr. Swanson agreed to build it for a stated price, and with this offer filed an alternative, agreeing to build the tank on the same terms as the pavement was built—10 per cent. on the cost of the material and \$1 an hour.

After discussing the tenders, the Council adjourned, to re-assemble on Monday, the 14th.

When the Council met on Monday evening, action in the matter was postponed.

At Special Meeting No. 3, on Tuesday, the Council decided unanimously to accept F. Swanson's alternate offer, with the stipulation that the cost of the work do not exceed \$1150.00.

LOCAL NEWS.

Mr. and Mrs. F. W. Lundy left for Vancouver on Sunday morning's train. Mr. Lundy is in attendance at the sessions, in that city, of the Canadian Bar Association.

Mr. D. McDonald was in attendance on Saturday afternoon at the meeting in the Macdonald Hotel of the managers of the Bank of Montreal.

Mr. Hood was down from Lacorne, B.C., on a visit.

Messrs. Valentine and Adam Mohr returned on Saturday from a motor trip to Mundare.

Constable J. T. Jones, Edmonton, was in town Saturday, on business.

Mr. Charles Helling returned from Edmonton the other day with brand new license plates on his Grand old Henry.

Game licenses may be procured at The Sun Office.

Mr. E. O'Leary has secured the contract for painting the school-house at Pelly.

J. Hadley, the Lumber King at Styal, made a business trip to Stony on Saturday.

Lutheran services were held on Sunday afternoon, in the Town Hall.

Mr. Geo. A. Ware, of Edmonton is arranging to hold a series of meetings in Stony Plain under the auspices of the International Bible Students, on Sunday afternoons, commencing next Sunday at 3 p.m.

Attention is drawn to the advert. on page 6 of the Federal Minister of Finance, regarding conversion proposals to those holding Victory Bonds which mature December 1. The new bonds will be dated Nov. 1st, thus giving the holders of the bonds a bonus of a whole month's interest.

The Radiophone Concert and Radiophone Dance billed by Edmonton parties for Tuesday night, in Stony, did not take place.

Thursday and Friday seen a large influx of visitors to town who had not heard of the Fair's postponement. They had come from far and near, and included Chiang So, who made a 70-mile trip to be present.

The A. R. Police have leased the Charlie Rice house, on Second St., next the Zilliox harness shop, and a detachment will be established there.

The ball game the High School team was to play with Graminia on the 13th had to be postponed on account of wet grounds.

Another good football game was played on the local grounds Friday night between Mike's Pets and the Spruce Grove team. The visiting team was shy a few of their good players, including their captain, so the local crowd trimmed them to the tune of 3 to 2.

The Fair dance on Friday night last proved a big attraction. The hall was comfortably filled, and the large crowd of dancers enjoyed themselves nicely to the music supplied by Jardide's Edmonton Orchestra.

Results of departmental exams, in Grade 10, are published.

Close Application And Hard Work Is The Real Key To Success

Edward W. Beatty, president of the Canadian Pacific railway, is a young man in his forties, who has had a remarkable career. Today he is the successful head of the greatest corporation in the world. Mr. Beatty is more than a hard-headed "big business" man. His hobby is boys, and he is the president of the Boy's Farm and Training School at Shawbridge, Quebec, conducted by the Rotary and Kiwanis clubs, of Montreal, and regarded as one of the most successful institutions of its kind on the continent.

Speaking recently to the pupils he gave an address which is worthy of more than passing note. He encouraged the boys in the first place by pointing out that his own start in life was far from auspicious. He said: "When I was a young boy at school I did not believe in study, I worked a little, but I played a lot, and I did many of the things I should not do and left alone many of those I should. When I was 12 years of age and had finished one year's course in a prominent school in Toronto, my parents received a report which, without bragging, I think I may say was the worst report ever written about a boy. I was in trouble from the beginning of the year. I had spent most of my time after hours in school, doing the things I should have done during the class period. When this report was received it was accompanied by a note that in the opinion of the principal of that school it would get along fairly well if I did not return."

"I do not remember ever having felt so humiliated about anything as I was when I read that report. I felt that I had proved to the college and to the other pupils my inability to do as well as others and take advantage of the educational opportunities which were offered me. I was sent to another school where my record was not known, for which I was very thankful. I there fell into the hands of a teacher who was one of the best teachers for boys I have ever met, though he had a very violent temper. He encouraged us when he was not abusing us. If anyone showed inattention he was likely to be hit on the head with a ruler, but the first words of encouragement I ever received came from him. He told me that some day if I worked hard I might amount to something, which was news to me—I had never heard it before. In any event he gave me an inspiration to study, and so I worked, and the more I worked the more I realized how valuable it was, and as the years went on my appreciation of this fact increased until I am now satisfied that no one ever succeeded who did not work hard. That fortuitous events or accidents do not make for permanent success."

He emphasized that the most essential thing to obtain success is good health. A sound body usually means a sound mind. While it is not impossible, it is extremely difficult to anyone to work against the handicap of ill-health. Having good health there are certain moral qualities, he pointed out, without which a boy cannot obtain permanent advancement. The first, he declared, was honesty. No man, he showed, who was not honest could obtain permanent success. He might appear to do so, but without honesty it was impossible to gain, or to retain the respect of one's fellow men, and without that no man could be said to be a success.

Next Mr. Beatty emphasized the necessity for courage. On this point he remarked:

"Moral courage like physical courage, is of a great advantage to a boy. Moral courage is what enables a man to do right, regardless of what others think or say, who refused to do wrong no matter what the temptation. Physical courage is that independence and confidence in your own physical abilities which enabled a man to fight a bully, even though he is physically his superior, because he will not be put down through fear. Physical courage is very common. It exists to a more or less extent in most Canadian boys. Moral courage is more rare."

The third essential emphasized by Mr. Beatty is one seldom stressed,

namely, modesty. Mr. Beatty said that the mentioned modesty so prominently because it was a quality which as far as the outward evidences were concerned, was fast disappearing from the boys and girls of this generation. After urging the need of education Mr. Beatty finally urged the development of the quality which could be described as manliness. Manliness, he said, meant a boy who was courageous, fair and generous, and who respected himself and others. Every one admired a manly boy. No one admired a boy who was a sneak, who cheated or who did a mean or underhand thing. —Exchange.

Rumanian Trains Crowded

Conductors Cannot Collect Fares and People Travel Free
"Home" railroad trains in Rumania are so jammed with the roving populace that the conductors are powerless to collect fares. Hence the impression is conveyed that one may travel for nothing. Like most other war-affected countries, Rumania has been forced to take care of the thousands of people who want to travel. The Germans and Austrians, concentrated most of the rolling stock. Passengers today are forced to ride on the roofs, bumpers, running board and even on the undercarriage of the coaches. Fist fights and altercations, to say nothing of academic, total and otherwise, are of frequent occurrence.

Getting His Own Back

London's meanest man has just been discovered. He strode up to the boxoffice of a certain theatre, and presented a somewhat solid visiting card, asked for free admission. As the audience on that particular night was a poor one, his request was granted. At the conclusion of the first act the deadhead turned up again in front of the box-office, and in an agitated tone, said: "Look here, this is a rotten show. Give me my card back." —Pearson's Weekly.

The Wishing Fair by Corinne

Pinzie Tells About the Yaks.

LIKE the fox, another favorite A B C book animal is the yak. Almost always the "Y" page has a picture of a yak, and they are primarily painted white or gray, which anyone who knows anything at all about yaks must realize is quite, quite wrong.

Pinzie said he will never see any Yaks in the same country as the Yaks we found this out and have used this knowledge to their profit; for they not only did it but use it as a beast of burden. Just as we use the horse and ox. Also, people milk it just as we milk the cow.

Pinzie learned all this once upon a time when he was wandering around the mountains of Tibet, and after he reached home he told the other three Howries all about everything concerning Yaks. He also told them that Yaks, when wild, live up in the cold dry highlands.

Pinzie said: "I don't think I'd ever found them enough food there!" exclaimed Lorykina, who thinks more of eating, perhaps, than anything else in his life except sleeping.

"Oh," Pinzie answered, "I went up to the highlands, and I especially noticed any amount of very, long grass which is just what Yaks like." I also noticed that they are very lazy animals."

"How?" Lorykina asked, marking his interest in sudden interest.

Long Distance Forecast

Bell Predicted Development of Telephone 40 Years Ago

The remarkable foresight of the late Dr. Alexander Graham Bell, inventor of the telephone, is shown by a letter written by him as long ago as 1878, in which the tremendous development of the telephone service was predicted with wonderful accuracy. The letter was written to the capitalists of an electric company who were interested in the development of the telephone in England. By them the letter was issued in the form of a prospectus. Dated "March 25, 1878, Kensington, London," the letter includes the following: "At the present time we have a perfect network of gas pipes and water pipes throughout our large cities. We have main pipes laid under the streets communicating with the side pipes with the various dwellings, enabling the members to draw the supply of gas and water from a common source. In a similar manner, it is conceivable that cables of telephone wires could be laid underground or suspended overhead, communicating by branch wires with private dwellings, country houses, shops, manufactories, etc., uniting them through the main cable with a central office, where the wires would be connected as desired, establishing direct communication between any two places in the city. Such a plan as this though impracticable at the present time, I firmly believe, by the outcome of the introduction of the telephone to the public.

Part and Present

The late Mr. George Gould hated divorce. At a Lakewood dinner party a young divorcee was admiring Mrs. Gould's splendid jewels. "Oh, that's your wedding ring, isn't it?" she said. "How old-fashioned it looks, doesn't it? In the past they made them so much wider and heavier than they do now."

"In the past you see," said Mrs. Gould, "they expected them to last a lifetime."

Bulk Of Immigrants This Season Said To Be Composed Of Agriculturists

In the early months of the summer, Canada experienced a pronounced revival in immigration and there is ample evidence that the period of drastic restriction and positive discouragement has not killed interest in Canada and that faith in the Dominion as a source of new hope is as buoyant as ever. Canada is facing better immigration prospects than she has for some little time. The opening of the doors a little wider has but disclosed the dammed-up state of the stream which, given free release, is pouring in fuller force over the Dominion. Immigration, however, cannot be so exactly regulated, and the exodus of immigrants is the culmination of months of consideration, so that the full effects of the recent immigration concessions will not be experienced for some time. In all probability not before the spring of 1923.

The lowering of the barriers has had a further-reaching effect than the entry into the country of many formerly debarred by reasons of financial stringency. It has had a moral effect. The restriction, rightly regarded as an indication of Canada's internal economic condition, and many persons and families of comfortable means contemplating Canadian settlement were discouraged from doing so in the removal is seen the first flush of the dawn of better days, and consequently many of those arriving are in a condition to establish rapidly and securely.

The high desirability of those entering Canada at the present time is indeed pronounced. The concessions to popular demand for a wider door to immigrants did not include any lowering of the standard demanded, and those coming are of the highest type, subject to the same requirements which have prevailed for years. Canada has successfully impressed on those countries from which she draws her people, that her prime and crying need is for men who will go on the land, and of those entering the country the bulk is composed of agriculturists. There is a substantial proportion of domestic servants and of classes of labor whose services are required at the moment.

Every country which has formerly contributed to Canada's population has resumed its mission to these shores. Immigration for the first quarter of the year was about fifty per cent. from across the international border, and prospects are that many more United States farmers will come up to Canada during the remainder of the season. British immigration is of a healthy and desirable order, of sturdy constitution, and frequently heavily capitalised. Many Scottish farmers have already arrived this year, and in addition to the personally conducted parties of intending farmers from England there have been valuable parties of skilled craftsmen from Hebrides. Some members of the demobilized Royal Irish Constabulary, aided by the Imperial Government, have already arrived and settled in Canada and others are to come before the end of the year. At present Canadian agents are in India with expectations of inducing demobilized imperial army officers in that country to invest their grantees and possessions in British Columbia lands. Mention should also be made of the splendid work which is being performed by the Salvation Army in bringing out parties of domestic and ex-servicemen from the British Isles, assisting them in procuring passage, and finding them positions on arrival.

Though Canadian immigration falls broadly into two classes, British and American, many European peoples have contributed in a large measure to the agricultural development of the western provinces, and it is gratifying to note the same healthy interest in Canada evinced by the most desirable of these. The personally conducted land party has proved an excellent method in the case of people from the British Isles intending settling on Canadian lands and unacquainted with conditions, and this has been extended to other peoples. A sturdy band of citizens from Holland, Norway and Denmark have been conducted under expert guidance from their old homes to Canadian farms.

On all sides this awakening of interest is evident. It is a new faith

borne on the crest of the wave of brighter prospects, the dawn of a fuller realization, in the continued inability of many other countries to emerge from the economic slough into which they have plunged themselves of the desirability of Canada as country more rapidly throwing off its post-bellum depression, and its great place in the world's immediate future.

The Place for Unemployed

With Plenty of Work There Will Be No Need of Hand-Outs This Winter

The Saskatchewan Government is taking the stand that it will not assist municipalities in providing relief for unemployed. The chief, except in really needy cases. So long as able-bodied single men can be provided with work in the country they will be given no assistance. It is the proper position to take. Because of abnormal conditions, the Federal, Provincial and Municipal Governments have been distributing large sums of money each winter for several years. Some of it has been well spent in providing much needed relief in cases of real hardship. Some of it, on the other hand, simply encouraged loafers to loaf.

The harvest this year is exceptional. The farmers of Manitoba will spend probably \$6,000,000 for outside help alone during the next three months. Every able-bodied single man, now without permanent employment, can provide himself with a slice of cake to carry him through the winter if he desires to do so. Even married men with families can secure a part of the money they require for the winter by getting out in the harvest fields at once.

There are always needy cases, and neither the municipalities nor private citizens can afford to close their hearts to appeals to provide for these. But conditions are not now such that abnormal provision need be made. The sick and the unfortunate must be looked after; the able-bodied, only when it is shown that there is no work available and that due effort was made to provide for the winter by work in the fall.

The men who are being brought into the west for the harvest should be given emphatic notice that the cities will not provide for them in the winter. If they want to stay in the country, they will be able to find work on the farms. Otherwise they should avail themselves of their return tickets—Winnipeg Tribune.

New Use For Movie Camera

Used to Detect Stresses in Metal Rails Caused by Heavy Trains

The moving picture camera is being put to a new and practical use. It is now used to detect the extent to which the rails are deformed when a heavy train passes over them. Moving pictures are taken as the train goes by, and enlargements are afterwards made in which the depression or distortion of the rail under the wheels of the locomotive can be seen.

From these the stresses in the metal can be gauged. The kinema will thus be a very useful auxiliary to the railway engineer when he is laying a new track.

The First Line of National Defence
Lord Inchcape's comment on the British budget committee's report, suggested to you that the first line of a country's defence, and of the defence of civilized life, is solvency. If a man's expenditure exceeds his income, if he is foolish, he reduces his expenditure. If he is foolish, he goes on spending and borrowing on his assets, picking them for his loans, until he can borrow no longer, and then he is ruined. We are at the parting of the ways. We must reduce our expenditure and cease borrowing or we will come to grief."

Trouble Ahead

With a million Americans wasting money in strikes and a host of other Americans broadcasting money in idleness, it looks as if those of us who are sticking to the job would be lucky if we got our "three squares" a day.—From the Boston Transcript.

DO YOUR EARS BUZZ? HAVE YOU HEADACHES?

When your ears ring, your head aches, and you seem slightly hard of hearing, beware of Catarrh. Mr. J. A. Hannell writing from Greenmont, P.E.I., was similarly troubled, and writes: "And I don't want you to think that I'm just looking for a housekeeper that can talk good English. I used to think that love at first sight was just a thing to make books about, but I guess I've got mine now."

There was a lot more, but I don't care to write it.

What could I do but tell the man that I had no intention of marrying, and tell it to him in the kindest possible way? I must say that he took it very well, and I was really sorry to say goodbye to him when he left that night for his fourteen hundred and forty acre farm and his dog. He insisted that I should keep his address and let him know if I ever needed a friend or changed my mind. "I'll be Johnny-on-the-spot in either case, Miss Elliot, particularly in the last one."

He is a good soul! Why can't men and women be just good friends without any sentimental nonsense?

This distressing occurrence has almost made me forget the pleasant afternoon we spent at the Agricultural College. I have acquired still another ambition—to become a graduate in Domestic Science of the Manitoba Agricultural College. What little I saw of the work was so fascinating that I could hardly tear myself away.

Miss Alexander, Mary's friend, showed us everything, from the garden to the dormitories and from the kitchen to the carpenter shop.

Each girl has her own little garden plot in which she boxes and makes and weeds manfully, to the cultivation of her muscles and the destruction of her complexion. A few of the girls whom we met grumbled about the gardening, but the most of them seemed to enjoy it.

A few more grumbled about the sewing. One jolly-looking, little romp told me in confidence that she had sewed the waistband on an apron seven times and ripped it out six.

I wish the men who repeat the stale old joke to the effect that a woman cannot drive a nail without hammering her fingers could see the "flyswatters" which those girls were making as their lesson in carpentering. For the enlightenment of the uninitiated I must explain that a "flyswatter" is a nicely proportioned and carefully finished wooden handle in which is inserted a square of wire netting, the whole making an excellent instrument for the destruction of the ubiquitous house-fly.

The Domestic Science Department of the Agricultural College is a wide one, as I have imagined when I say that in one month the future teachers of Manitoba youth are to learn the elements of sanitation, how to manage a turn-out, how to choose a cut of meat and how to cook it, and it is chosen. The lesson on the different cuts of beef was very interesting, and to some no doubt the latest is heightened by the apparent danger, for the lesson is illustrated on a live animal. I can enthusiastically commend the instructors holding up their hands in holy horror, but their agitation is quite unnecessary. I did not see the process, but Miss Alexander told me that the girls were conducted to the cattle-barn, where they formed a circle around a mild cow on whose anatomy was chalked a diagram, such as we see in the beginning of the meat section in a cookery-book.

The dormitories, which are not really dormitories but separate rooms, are very good indeed. Tobin Hall is the residence; it is called after the Premier of Manitoba. All the buildings seem to be well fitted for their respective purposes, but it has been found that they are not large enough, so another site has been secured in St. Vital, which is south of Fort Rouge on the Red River, and work has been commenced on new buildings there.

There are two courses in Agriculture for young men: one of three years' duration, at the end of which time a diploma is granted; and one which covers five years and leads to the degree of B.S.A.—Bachelor of Science in Agriculture. English and mathematics are included in both courses.

Besides short courses in dairying and horticulture, the Domestic Science Department conducts a regular two years' course. This is in session during the winter months, and is well patronized by the young women of the West.

Mr. Bingham arrived this morning. He has been in the house for only a few minutes but he has made a very favourable impression on me, and I hope that I have made an equally favourable one on him. He is not so friendly as a Canadian would have been under similar circumstances, but it is like a breath of home to meet again an uncommunicative Englishman who wastes neither time nor words.

Mary is giving a little dance in my honour tonight, so I must stop writing and try to get my beauty sleep in advance.

(To be continued)

MY CANADA

—BY—
ELINOR MARSDEN ELIOT

with the Author

(Continued)

"Your farm must be quite a big one," I observed, rather ashamed of my petulance.

"Well," he drawled, "we can see the neighbours' place without a telescope, and the cook don't need a wireless machine to call the men to dinner. But I've got nine quarter sections—that's forty-eight hundred and forty acres. Never showed you any pictures of it, did I?" And he took some snapshots from an inner pocket.

When I had admired them sufficiently he put them back with seemingly unnecessary care, looked at his watch, cleared his throat, and then went on with his oration.

"You'd like this part of the country, Miss Elliot. The first time I seen you I says to myself, 'There's a girl that would like things on a big scale.' Don't know what give me the notion, but I got it and it stuck right to me. Of course it's a bit lonely in the winter sometimes, when you have nobody to talk to but your dog—my housekeeper and her maid don't speak much English. And I haven't even got a pipe. Mother made me promise when I was a little kid that I'd not smoke until I was twenty-one, and ever since I've been too busy to learn. It is times like that that a man wants a wife."

Here he took off his hat, and stood with it in his hand as he finished, an act that to me was an indication of his innate gentleness.

"I haven't got much in the way of education or polish," he continued, "but Mother always says that a good son makes a good husband, I've done my best to be a good son, and"

No Appetite

Nervous exhaustion leads to distaste for food. The nerves of the stomach are weak, digestion fails and you become generally upset and out of sorts.

The secret of complete restoration is in getting the nervous system fully built up.

Mrs. R. Cheney, 208 Richmond St., Chatham, Ont., writes:

"I was troubled with indigestion, which caused me many sleepless nights. I would be in terrible distress at times, and would get no relief for two or three hours. For sixteen months at a time, but that I should have been, as I did not eat anything else. I did not know what to do, as I had tried so many different remedies, as well as doctors' medicines, without getting personal relief. Finally I got some of Dr. Chase's Nerve Food, and while on the second box noticed that I was improving. I continued the treatment, and I am now fully restored, and have returned to my regular diet. My husband has also taken Dr. Chase's Nerve Food with splendid results, so we are glad to recommend it to others."

Dr. Chase's Nerve Food, 50c a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

Engines and Cars await Grain Rush

Preparations upon a monumental scale for the marketward movement of Western Canada's 1922 grain crop have been made by the Canadian National Railways. Hundreds of giant locomotives and tens of thousands of freight cars have been put through the railway's shops at Winnipeg and made fit and ready for the greatest traction effort of the year—and of many years.

This mobilization of equipment has been in progress since the beginning of the year, with the result that Canadian National Railways are now fully prepared, waiting and even eager to get to the business of hauling grain. If all the engines ready for service were placed end to end, they would

stretch out for a distance of more than ten miles; while if all the cars prepared since the first of the year for the movement of grain were placed end to end, they would stretch out approximately 350 miles.

The history of the preparation starts with the desire on the part of the management to ease the unemployment situation last winter, and at the same time accomplish some useful purpose. The management conceived the idea of putting into the maximum of efficiency all of the bad order equipment on western lines. Full staffs of men were set to work in the two great shops and yards, and hauling locomotives and freight cars headed in for treatment.

The locomotives ready to move the crop have an average length of 65 feet. Some conception of the enormous power represented in these iron steeds may be gleaned from the statement of fact that assuming them to be equal to the Mikado, capable of drawing 4,500 tons; the hauling capacity of these locomotives would be 121,620,339 bushels of wheat if all the engines were hauling capacity trains at the same time. In other words, the motive-power prepared by the Canadian National for moving the crop, is equal to the task of hauling about one-third of the total crop of Alberta, Saskatchewan and Manitoba at once.

Children Cry For

Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more responsible for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

Should Work For Better Understanding Between English Speaking Nations

San Francisco.—Four men, prominent in the world's politics, addressing the California branch of the English Speaking Union, in session here, commended the aims of the union in seeking to bring the English speaking nations of the world into closer harmony with a view toward the fostering of an international spirit of good will.

The four speakers—William Howard Taft, Chief Justice of the United States and former President; Lord Shaw, of Dunfermline, Member of the British House of Lords; George W. Nicksarham, former Attorney-General of the United States; and John W. Davis, former American Ambassador to Great Britain, are here for the convention of the American Bar Association.

Each of the speakers emphasized what was termed a need of fraternity among the English speaking nations.

Speaking in a happy vein, Chief Justice Taft referred to his recent visit to England and the cordial welcome accorded him there.

After paying special tribute to Lord Shaw, the Chief Justice said he saw a "better day in store for the world."

"We of the English speaking nations have faith in each other," he continued. "We have hope for each other but we must have a spirit of fraternity. If we are to insure the peace of the world, I believe that the English speaking nations of our world are steadily realizing that it will only be through wholehearted fraternity that we can hope to secure lasting peace. A common tongue is the heritage we already possess, and it is for us to cement our ideals through that common tongue."

Lord Shaw expressed a desire to see a wider understanding among English speaking peoples. "Misunderstanding is best cured by understanding," he declared. "When we stop troubling about our poorer qualities and find the best ones we will all understand. That is what England has tried to do in Ireland and it is succeeding so well that today I believe Ireland is on the crest of a wave that will send it on to splendid accomplishment."

British Cruiser Aground

Crew of 800 Men of Flagship Raleigh Rescued

St. Johns, Nfld.—The entire crew of the British cruiser Raleigh, which ran aground on Point Armour, in the Straits of Belle Isle, were landed safely, according to reports reaching here from the scene of the wreck. The 800 men are ashore on an uninhabited coast and will be taken to Halifax.

The Raleigh was the flagship of the North Atlantic and West Indies squadron. She was in Quebec a couple of weeks ago.

Admiral Sir William Pakenham was aboard the vessel, which had been cruising off the Labrador coast.

The Raleigh, a vessel of 9,950 tons was built during the war to hunt German raiders. The first of a new type of British cruiser, she was launched in September, 1919. She has 7.5 inch guns, much heavier than usually are placed on light cruisers. The object was that she might be able to outrange any common raider the enemy might send out. She carried also anti-aircraft guns.

Commends Empire Exhibit

Toronto.—Declaring that the remedy for Britain's post war ills lies in developing inter-imperial trade, Lord Morris, former Premier of Newfoundland, but now a resident of London, England, who is a visitor in Toronto, expressed the opinion that the British Empire Exhibition to be held in 1925 will be a powerful agent to that end.

To Bring British Coal

Toronto.—Within the next week or ten days, 5,000 tons of British anthracite coal, at least, will be on its way across the Atlantic in Canadian Government Merchant Marine ships.

To Develop the North

Stefansson Looks for Great Commercial Development in Arctic Regions

Toronto.—"The age of exploration of the Arctic regions is over; the age of commercial development has begun. I intend to devote the rest of my life, not to the exploration of the north lands, but to the building up of a greater Canada." Thus spoke the explorer, Vilhjalmur Stefansson on the occasion of a short visit to Toronto. "I venture to prophesy," he declared, "that within 50 years from now there will be less land in the northern hemisphere that is considered worthless because of cold than there is land in the south that is considered worthless because of its being dry."

Discussing the proposed flight of the explorer, Amundsen, over the north pole, Mr. Stefansson could see no reason why it should not succeed. "If he does succeed it will be merely the first flight in a continuous series," said the explorer. "The conditions are ideal; it is only the ill-informed who believe that flying conditions over the pole in summer are more difficult than over the Atlantic. As a matter of fact, they are better, because the temperature is about as warm as over the Atlantic and is more uniform, because there is no sunset and the daylight is continuous. The flight over the pole will constitute no distance record. The aerial journey from Newfoundland to England has already been accomplished, and that is longer."

Feel Earthquake Shock

St. John, N.B.—A dispatch from Edmundton, N.B., says that a severe earthquake shock was felt there on Aug. 8. People were awakened from their sleep by the rocking of their homes, and a pile of lumber was overturned.

Every dollar spent in your home town is a boost for the community.

TWO MONEY-MAKING MACHINES

Allied Premiers Have Difficult Problem In Reparations Discussion

Increase In Immigration

Figures for May Show Over 11,000 New Arrivals in Dominion

Ottawa.—An increase over the April figures is shown by immigration records for May, when 11,199 persons arrived in Canada, as against 6,598 during the previous month. Of the number, 8,323 came via ocean ports and 2,876 from the United States. In May, 1921, 14,143 persons were admitted. Of the 11,199 persons admitted in May last, 4,987 were adult males, 3,925 adult females and 2,284 children under 14 years.

The destinations of the immigrants by provinces are: Ontario, 4,688; Quebec, 1,705; Alberta, 1,302; Saskatchewan, 1,106; British Columbia and Yukon, 1,066; Manitoba, 1,040; Maritime Provinces, 288.

Of the 8,323 via ocean ports, Great Britain and Ireland contributed 5,972; Italy, 735; Poland, 582, of whom 196 were Hebrews; Norway, Sweden and Denmark, 265; and Hebrew other than Polish, 283.

Chinese Asked To Aid Swatow Sufferers

British and Japanese Ships Conveying Supplies Free

Hong Kong.—Chinese overseas are being appealed to by the Chinese Chamber of Commerce to aid the stricken countrymen at Swatow, the north port of here which was virtually destroyed by a typhoon and tidal wave a week ago, with the loss of 29,000 lives.

British residents of Hong Kong have contributed liberally to relief of the stricken people and British and Japanese steamers are conveying supplies to Swatow free. Universal sympathy has been aroused by the appalling magnitude of the disaster.

Foresees Wireless Power Transmission

Dr. Steinmetz Says Radio May Turn Wheels of Industry

Chicago.—Dr. Charles Steinmetz, of the General Electric Company, told delegates to the International Radio Congress that "there may be a time when power to turn the wheels of industry will be furnished by radio. In some respects radio power transmission exists today, for the message you receive by radio, has been carried by the power of electric magnetic waves from the sending to the receiving station. Successful work is now being done in directing radio waves as, for instance, our trans-Atlantic stations send out most of their power eastward."

London.—M. Poincare and Mr. Lloyd George are apparently further apart on what it is to be done with Germany than before they met and the conference of allied statesmen is in danger of breaking up with Franco-British relations worse than they were and with no decision of moment on the reparations question. They may, however, agree to a short moratorium for Germany.

M. Poincare has indicated to Mr. Lloyd George things cannot go on as they are and that France may be compelled to take independent action.

Premier Theunis of Belgium is striving to bring the British and French policies near together.

Mr. Lloyd George agreed to the French suggestion regarding the collection of twenty-six per cent of German exports at her frontiers, which would be paid into reparations fund. He also agreed to the suggestion for taking over the state forests and mines in German occupied territory.

The important point on which the two premiers were unable to agree was the establishment of a customs barrier along the Rhine providing for duties on everything going into and coming from the Ruhr region, the principal purpose being to tax the coal going into the rest of Germany and allow participation in German industrial concerns.

The British position, as expressed by Mr. Lloyd George to Premier Poincare during the conference, is said to have been something like this:

Germany is unable to pay; she is ruined, and an effort to squeeze large sums from her would merely add to her difficulties, without profiting the Allies, and, besides, would delay the economic reconstruction of Europe. Germany, it was contended, must have leave to suspend payments without having hampering conditions imposed upon her.

The French viewpoint, briefly stated, is that Germany is still economically powerful and able to pay a great deal, but that, partly by design and partly by circumstance, she has assumed an appearance of weakness which in fact does not exist. The French propose to give Germany a brief moratorium to see if she is willing to promote reforms in her official finance and currency and apply productive measures which would yield the means to pay the reparations.

Mr. Lloyd George first suggested a moratorium until the end of 1921, but later modified this to the end of 1922. The belief of M. Poincare is that a moratorium, to the end of September would suffice.

Mr. Lloyd George, has expressed the opinion that a rupture in the agreement was probably if not inevitable. He added that this was regrettable, both from the British and French viewpoints, but that Premier Poincare's attitude left no option.

Sir Edward M. Gregg, Mr. Lloyd George's private secretary, summoned the British newspapermen to the Prime Minister's residence in Downing Street and made a statement to this effect.

New Zealand Wants Larger Naval Defence

Dominion Must Aid Imperial Parliament Says Premier Massey

London.—Discussing the naval defence question in the New Zealand Parliament, Premier Massey said a state had been reached where something more must be done to aid the Imperial Government in providing a sufficient defence for the Empire, says a Reuter cable from Wellington.

The Dominion of New Zealand, said the Premier, was not doing enough and the matter would be treated in the budget and the whole question would be opened up. It had been left for New Zealand, he continued, to give the other states a lead in dealing with Empire defence.

Five Million Surplus

Quebec.—The financial report of the province of Quebec for the fiscal year ending June 30, 1922, shows a surplus of ordinary revenue over expenditure of \$5,022,419.

New Game Regulations.

New regulations concern-
ing the hunting and killing
of game in the north country
have been put in effect, as
announced by Benjamin Law-
ton, Chief Game Guardian of
the Province. For some years
residents north of Parallel 55
have been permitted to kill
game at any season of the
year for their own use, but
this privilege has been abused
by residents and others.

At the last session of the Leg-
islature the game act was amended
to provide that no person shall
kill game birds save during the
open season which in the case of
ducks and geese is from September
1st, to December 14, and for prairie
chickens and partridges from
October 15 to October 31. Except-
ion has been made in the case of
White Winged Scoter commonly
called Black Duck. These may be
killed at any time north of the
55th. parallel. In the case of big
game the act now provides that
residents of that part of the pro-
vince residing north of the 55th.
parallel may kill big game during
the close season only after having
obtained a resident's big game li-
cense, but in no case are big game
animals to be killed during the
closed seasons unless required for
food.

The Motherwell Shield.

An interesting incident dur-
ing the recent visit to Ed-
monton of Hon W R Mother-
well, Dominion Minister of
Agriculture, took place at
the Board of Trade rooms,
when he presented to the Ed-
monton City Dairy the Mother-
well shield, donated by Mr
Motherwell himself for the
exhibit of butter obtaining
the highest score at the Re-
gina Fair. The Edmonton City
Dairy has won the shield for
two years in succession, and
the trophy becomes the per-
manent property of the com-
pany.

C E Christensen, butter-
maker for the company, was
introduced to Mr Motherwell
Secretary of the Board.

Mr Motherwell, in a grace-
ful speech, referred to the in-
terest he had always taken in
the dairy industry, and said
he was delighted to know the
Shield had at last found a
home, and he did not know
of a better resting place for
it than the city of Edmonton.
He congratulated Mr Chris-
tensen and the E.C.D. on the
quality of butter that had en-
abled them to win the shield
permanently.

Prudent People Won't Wait.

It might not do any more
good than it did in previous
years, says the Edmonton
Bulletin, but it would cer-
tainly do no harm if Alberta
papers generally began to re-
peat their usual midsummer
advice to people on the prai-
ries to lay in their winter's
coal early. Four or five months
from now they will want coal,
will probably want it badly,
and the prospect of every-
body being able to get it then
is not as good as usual.

Most of the mines on the con-
tinent are tied up or working at
the minimum rate of production,
the reserves are disappearing,
the strike is still on, and summer
is passing. The Alberta fields have
not been producing more heavily
than they commonly do in summer.
Prudent people will not this year
wait until the freeze up before
they begin to fill the bin.

To Use Potato By-products

H Stutchbury, trade com-
missioner for Alberta, will
make a thoro investigation
and secure all available data
on the manufacture of pota-
to by-products with the ob-
ject in view of assisting the
potato growers in finding
some means of disposing at a
profit of their second grade
and cull potatoes.

While there usually is a
good demand for all of the
first class potatoes grown in
the province, potato growers
feel that the success of the
industry depends entirely upon
finding an outlet for the
lower grades.

An effort will be made to
secure all available informa-
tion on the manufacture of
potato flour, potato starch,
alcohol, and the various other
by-products.

To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders
of these bonds who desire to continue their
investment in Dominion of Canada securities the
privilege of exchanging the maturing bonds for new
bonds bearing 5½ per cent interest, payable half yearly,
of either of the following classes:—

- Five year bonds, dated 1st November,
1922, to mature 1st November, 1927.
- Ten year bonds, dated 1st November,
1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st
December, 1922, the new bonds will commence to earn
interest from 1st November, 1922, GIVING A BONUS
OF A FULL MONTH'S INTEREST TO THOSE
AVAILING THEMSELVES OF THE CONVERSION
PRIVILEGE.

This offer is made to holders of the maturing bonds
and is not open to other investors. The bonds to be
issued under this proposal will be substantially of the
same character as those which are maturing, except
that the exemption from taxation does not apply to the
new issue.

Holders of the maturing bonds who wish to avail
themselves of this conversion privilege should take
their bonds AS EARLY AS POSSIBLE, BUT NOT
LATER THAN SEPTEMBER 30th, to a Branch
of any Chartered Bank in Canada and receive in exchange
an official receipt for the bonds surrendered, containing
an undertaking to deliver the corresponding bonds of
the new issue.

Holders of maturing fully registered bonds, interest
payable by cheque from Ottawa, will receive their
December 1 interest cheque as usual. Holders of
coupon bonds will detach and retain the last unmaturing
coupon before surrendering the bond itself for conversion
purposes.

The surrendered bonds will be forwarded by banks
to the Minister of Finance at Ottawa, where they will
be exchanged for bonds of the new issue, in fully
registered, or coupon registered or coupon bearer form
carrying interest payable 1st May and 1st November
of each year of the duration of the loan, the first interest
payment accruing and payable 1st May, 1923. Bonds
of the new issue will be sent to the banks for
delivery immediately after the receipt of the surrendered
bonds.

The bonds of the maturing issue which are not
converted under this proposal will be paid off in cash on
the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

Thirty Years' Successful Farming

Remarkable Achievement Of a Pioneer Manitoba Farmer

In a period when the profession of farming is more or less stagnant, when the tendency in so many countries is from the rural districts to the cities and industrial centres, and the oft-made complaint is that the ardors of deprivations of an agricultural life are not commensurate with its compensations, it is consoling to read the history of a satisfied farmer of thirty years' standing, one of the continent's premier agriculturists, celebrating his seventieth birthday in the tranquil satisfaction of the honors which have come to him in his chosen profession.

Such a man is Samuel Lacombe, of Birtle, Manitoba, who expresses pride in the realization of the signal part he has played in making the possibilities of Western Canada known to the world.

The record of Mr. Lacombe's thirty years of farming is almost phenomenal. In that period, with the products of his Manitoba farm, he has carried off no less than three thousand prizes, including the world's championship for wheat at the Peoria International Fair in 1917, and the sweepstakes for the best individual farmer's exhibit as well as the "sweepstakes" for wheat in the dry-farming section at the World's Soil Products Exhibition in Kansas in 1918. His Canadian successes constitute an aggregate which gives him an average over his farming years of one hundred prizes per year.

Born in a little Devon village and for ten years following the pursuit of market gardener, Mr. Lacombe's experience forms a further addition to the examples of outstanding success

achieved by immigrants from the British Isles, unacquainted with western conditions. He came to Winnipeg in 1889 and proceeded to Birtle, where even then existed a thriving colony of old country farmers. After a year's experience as hired man with a farmer in the district, he rented a farm, which after five years, he purchased and still occupies.

At a time when everyone was engrossed in wheat he concentrated not so much on grains as on vegetables. His first local exhibit won three prizes, and in his first ten years of farming he made forty entries and secured 134 awards. From 1905 to 1908 he grew roots, vegetables and grain for the Canadian Pacific Railway for exhibition purposes in other countries, and produced citrons, cucumbers, pumpkins, squash and narrows for the Dominion Government for the same purpose.

Mr. Lacombe's career as an exhibitor has been one consistent succession of triumphs too lengthy to mention in detail. His international successes have brought considerable renown to Western Canada and widely advertised the wonderful possibilities of intelligent farming with assiduous application. Mr. Lacombe recently celebrated his seventieth birthday on the farm which has been the scene of every one of his achievements. He can look back over his thirty years of agricultural life in Manitoba with supreme satisfaction in the knowledge that in winning renown and prosperity for himself he has pointed the way to thousands of his fellow-countrymen.

cepted an invitation to serve on the royal commission in connection with the conference of honors.

Drought in British Columbia this year will compel some cattlemen to sacrifice half their stock.

The King has approved the appointment of Sir Harcourt Butler to succeed Sir Reginald Cradock as Lieutenant-Governor of Burma.

Captain John Ross, 73 years old, who piloted the Maid of the Mist steamer below Niagara Falls for 33 years, died recently.

The Soviet Government announced that owing to the excellent crop prospects the foreign trade department is instructing its bureaus abroad to cease buying flour and sugar.

F. Ho Lem, 10th Regiment, Calgary, was the high westerner in the Corporation of the City of London Competition at the Ontario Rifle Association meeting Toronto, with a score of 101.

A delegation of the Great War Veterans' Association, Victoria, met Hon. Dr. H. S. Beland, Minister of Soldiers' Civil Re-establishment and Public Health, and complained to him of the inefficiency of certain departments dealing with Imperial matters.

The Strike Problem

Richard Spillane, Jr. the Philadelphia Public Leader

Whether employer or employed sin most in the horrors visited upon the public in the form of strikes is not the question. Strikes are results. They will continue until their cause is removed. Now to do that is a problem. But the problem, however difficult, is not insoluble. A little of the genius that transformed the world from agrarianism to industrialism, mixed with common sense and the Golden Rule, surely would find the way.

KEEP CHILDREN WELL - DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevents stomach and bowel troubles, or if the trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail for 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Religious Freedom Under Bolshevism
The baptizing of children will not be allowed in Russia in the future. The Supreme Council of the Church, which is under Soviet control, is elaborating a new church law dealing with baptism. In this the age of baptism is fixed at 18, and the consent of the person concerned must be obtained in writing and filed with the authorities.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Expeller has proved a boon to suffering children everywhere. It seldom fails.

The Inca warriors, prior to the Spanish conquest, used to decorate the saddles of their horses with the heads of their enemies killed in battle. To lessen the weight of these ghastly relics the warriors, by a secret process, removed all the bones and embalmed the head.

She Has Raised A Family Of Ten

DR. FOWLER'S
EXTRACT OF
WILD STRAWBERRY
NEVER FAILED HER

Mrs. Ervin W. Stairs, East Waterville, N.B., writes:—"I have raised a family of ten children and have always used Dr. Fowler's Extract of Wild Strawberry for summer complaint, and it has never failed. Four years ago, when the cholera was about, some of my neighbors called in the doctor, but could get no relief. I told them about Dr. Fowler's, and after taking it, they were soon well again. I also used it for two of my own children at the same time when they were passing blood, and a few doses soon made them well."

If you want to be on the safe side ask for Dr. Fowler's Extract of Wild Strawberry, and insist on getting what you ask for. There are many imitations on the market, so be sure and get the original "Dr. Fowler's"; price, 50¢ a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Dainty and Comfortable Are The New Summer Frocks

Here is shown a very simple little frock for afternoon wear which is very dainty and cool looking. It is of white tulle de chene embroidered in white glass beads in a very simple design, which does not make the dress too heavy as is often the case with beaded gowns.

A Gloomy Forecast

U.S. Geologist Expects Destruction in Many Continents

Within 30 days Southern Europe, Northern Africa and the whole of Asia will be destroyed by earthquakes, and the residents of these countries will all be killed.

This is the latest prediction of Dr. M. A. Nobles, a physician and geologist, who has studied volcanic disturbances since his graduation from Syracuse University in 1881. The western section of the United States beyond the Rocky Mountains is also on Dr. Nobles' schedule to disappear. Canada is to remain on the map.

The eruption that will wipe out Europe will occur near Budapest, where there are at present 70 volcanoes, Dr. Nobles said.

It Bids Pain Begone.—When neuralgia racks the nerves or lumbago cripples the back is the time to test the "virtue" of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

Story Of Heroism

Officer Gave His Life That Seamen Might Live

A thrilling story of heroism at sea was unfolded in Montreal when the master of the steamer Cornalio brought his ship into port and reported the loss of his second officer, Angus J. Glasgow.

The officer was washed into the sea during a gale that struck the ship on August 4. Although unable to swim, he refused help and ordered the rescuing boat to save two of the steamer's sailors who were also thrown into the sea. Both these were saved while the second officer was drowned in full sight of the ship.

Only the uninformed endure the agony of corns. The knowing ones apply Holkway's Corn Remover and get relief.

Napoleon held the view that the shortest men are often the brainiest, and by way of demonstrating this belief he nearly always selected small men for the biggest tasks.

News Away from Home.

The following which appeared in col. 1, page 6, of the Edmonton Journal on Wednesday, August 9th, is quite refreshing:

"Owing to poor crop conditions, the Stony Plain Agricultural Society decided last Saturday to cancel the Fair."

Safety 1st—Get a License.

Acting under orders, Constable Jones, of the A. P. Police, has started a campaign against local owners of cars who are operating without the proper license plates. Several cases were discovered where the licensee was very kindly loaning one of his number plates to a friend. One owner had been "too busy" to attach his plates when purchased; while still another motorist who got "hooked" under Section 17,

claimed he never used the Highway, altho he motored to Stony from a place three miles beyond Carvel.

Flavor Extracts Over Strength

It has come to attention of the public that grocers in the Province are offering for sale extracts for flavoring containing more than 2 1/2 per cent alcohol, the labels upon which bottles do not comply with the Alberta laws.

All such extracts that contain a greater percentage of alcohol than that permitted for beverages under the Albert Liquor Act must be registered, with the provincial government, and the contents of each bottle described in detail on the label. No formulas have been submitted to the government by the manufacturers of certain of these extracts, Attorney-General Brownlee states.

Retail grocers who are handling any of the products coming under this heading are advised to cancel their sale until the manufacturers have registered their goods in accordance with the law. Prosecution of the manufacturers may be necessary.

Stony Plain and District

Have you finished "preserving" yet?

Mr. McCulla arrived from the East Tuesday morning.

Inspector R. B. Brooks has been holidaying in the Vermilion district, visiting with relatives and renewing old acquaintances.

Mr. Starr, who has been relieving at the G. T. Station, left Tuesday for Evansburg.

The Government Farm on Tuesday sold H. A. Fife of Edson, a purebred Yorkshire sow.

Holborn U. F. A. holds its regular meeting tomorrow night, 18th.

Pitzler Bros. shipped a mixed car of stock to the Edmonton yards on Monday.

Mr. G. Valk, an Edmonton buyer, was in this district, this week purchasing cattle, and Tuesday shipped 37 head, procured from N. M. Carmichael 4 head, Jos Kulak 2, Geo Kulak 2, Edwin Hoffman 5, F. Fischer 4, Geo Schultz 9, Sam White 7, Dan Brox 2, Mrs. A. Ulmer 1, C. Steffler 1.

Contractor McCube and his squad of carpenters are now at Acheson, where a grain elevator is being built.

Patrons of the Grand Trunk will note that the 4:27 p.m. passenger train to Edmonton runs every day except Tuesday.

The high winds on Saturday last played havoc with a number of the phone poles in this district, blowing a large number of them across the highway. It might be stated a good percentage of the poles had a pretty good slant on before the last blow came.

D. Dubry, High Prairie, an old-timer in this district, came down last week for the Fair.

Having failed to get suitable men to operate the Wheat Board, Premier Greenfield has abandoned the notion of having a board to handle this year's crop.

Reports from the employment bureau say that a large number of applications are coming in for farm help, but the real rush will start near the end of this month, when harvesting will be in full swing. Wages for this year will run around \$3.50 a day.

Mr. Gilbert has the contract for supplying milk from his accredited herd to the camp of the boys of the Rotary Club, at Edmonton Beach.

N. K. Shorten, Chiropractor, of Edmonton, has arranged to be in Stony Plain on Monday, Thursday and Saturday afternoons, from 1 to 4.15.

Dr. Frith, Dentist, will be at the Royal Hotel on Saturday, August 26.

Sanguo Fair opens Wednesday next, the 23d.

LOST—Between Brightbank and Stony Plain, Leather suitcase, initials R. W. C. Finder return to Stony Plain Sun or R. P. Shaw.
